DIREZIONE GENERALE ARCHEOLOGIA BELLE ARTI E PAESAGGIO
Soprintendenza Archeologia, Belle Arti e Paesaggio
per le Province di L'Aquila e Teramo

To whom it may concern,

We are pleased to support the PRIN 2026 proposal **H⁴-VALUE — Heritage, Haptic, Human and High-Tech Values in Architectural Living-Use Ecosystems**, coordinated by Mariangela De Vita, researcher at Department of Engineering, ICT and Technology for Energy and Transport of the National Research Council (DIITET-CNR).

The project proposes an original and highly innovative transdisciplinary framework addressing emerging challenges related to Architectural Heritage management, adaptive reuse, Cultural and Creative Industries and adaptive Digital Twin ecosystems. We particularly appreciate the integration between conservation principles, human-centered approaches, performative spatial experience and advanced technological infrastructures within a coherent methodological framework.

The scientific positioning of the project appears particularly relevant with respect to current international debates concerning Living-Use heritage environments, adaptive reuse methodologies, environmental quality and participatory cultural activation processes.

We consider the H⁴-VALUE framework highly promising in terms of scientific advancement, methodological innovation and long-term transferability across different heritage, cultural and governance contexts. The proposed integration between architecture, haptic perception, adaptive technologies and socio-cultural activation represents a significant contribution toward the emergence of new interdisciplinary trajectories within Architectural Heritage studies.

For these reasons, we express our strong interest in the development of the project and our willingness to support its dissemination, networking and scientific valorization activities within relevant institutional and research contexts.

Sincerely,

Dott. Massimo Sericola

Soprintendente Archeologia belle arti e paesaggio per le province di L'Aquila e Teramo

L'Aquila, 26/05/2026
