

Letter of Endorsement

To whom it may concern,

We are pleased to express our support for the PRIN 2026 project **H⁴-VALUE — Heritage, Haptic, Human and High-Tech Values in Architectural Living-Use Ecosystems**, coordinated by Mariangela De Vita, researcher at Department of Engineering, ICT and Technology for Energy and Transport of the National Research Council (DIITET-CNR).

The project addresses highly relevant contemporary challenges concerning Architectural Heritage management, adaptive reuse, Cultural and Creative Industries, environmental sustainability and human-centered cultural activation. In particular, we recognize the scientific and territorial relevance of the proposed interdisciplinary framework for the interpretation of Architectural Heritage as a performative and adaptive Living-Use ecosystem.

Considering the coherence of the project with current territorial and cultural regeneration strategies, we acknowledge the potential impact of H⁴-VALUE on the enhancement of heritage accessibility, cultural participation and adaptive governance processes.

Within the limits of our institutional competences and operational availability, we express our willingness to collaborate with the research team by facilitating access to selected heritage environments, documentation and case-study contexts relevant to the validation and implementation activities foreseen by the project.

We also recognize the strategic relevance of the proposed activities for the city and territory of L'Aquila, particularly in relation to post-seismic regeneration, adaptive reuse processes and the integration between Architectural Heritage, cultural activation and innovative digital ecosystems.

We believe that H⁴-VALUE may significantly contribute to the advancement of research and innovation in the fields of Architectural Heritage, adaptive reuse and Cultural and Creative Industries, while generating positive cultural, social and territorial impacts.

Sincerely,

Paolo Naldini
Director, Fondazione Pistoletto Cittadellarte Impresa Sociale ETS
